FOR IMMEDIATE RELEASE

State Route 128-Near State Route 121 Interchange Paving Repair Work One Way Traffic Controls In-Effect-Until November, 2014

NAPA COUNTY – The California Department of Transportation (Caltrans) is performing pavement repair work on eastbound and westbound State Route 128 (SR-128) between Knoxville Road and the Napa/Solano county line. This section of SR-128 is located in rural eastern Napa County approximately 18 miles northeast of Downtown Napa.

Motorists traveling to Northeast Napa County and nearby Lake Berryessa may encounter slow-traffic on SR-128 approaching and leaving the area.

The work will repair and repave approximately 15 miles of SR-128 in both eastbound and westbound directions.

To ensure public and worker safety, one-way traffic controls will be in-effect during normal construction hours which are Monday through Friday from 7 a.m. until 5 p.m.

During one-way traffic controls, crews will alternate closures on eastbound and westbound SR-128 to allow one-lane of traffic to proceed at a time. During the traffic controls, one lane of traffic will remain open at all times.

Caltrans began work on this project, the week of September 8th, and could be completed with the work, as early as the beginning of November.

In the meantime, construction is continuing on the new Capell Creek Bridge on SR-128 in the area. Work on that project may also require some flagging operations.

Motorists should expect delays and allow for extra travel time.
